

Ultra SpillDeck Bladder Systems®

Hidden Containment Bladder Automatically Unfurls To Capture Large Spills Or Drum Leaks

U.S. Patent No. 5,642,834; 5,007,557
Canadian Patent No. 2,030,984

Part# 1320

Small spills and leaks are captured in the 11 gallon sump.

Large, catastrophic leaks flow into the bladder through a bulkhead fitting. Protective "trap door" opens automatically to allow bladder to unfurl.

Rugged, double layer polyethylene bladder allows 66 gallons total containment.

- Ultra-SpillDeck Bladder Systems are low profile, polyethylene containment decks which meet EPA and Uniform Fire Code Spill Containment Regulations. Available in 1, 2 and 4-drum modules, the low 5 3/4" deck height allows safe and convenient drum loading, even without drum handling equipment. Add the optional polyethylene loading ramp for even greater handling ease.
- Low 5 3/4" deck height is the same as wooden pallets — allows drums to be "jockeyed" onto SpillDeck Systems when standard drum handling equipment is not available.
- Overspills and small leaks are captured in the SpillDeck's sump; catastrophic leaks deploy the bladder, allowing the system to meet EPA and Uniform Fire Code Spill Containment Regulations.
- SpillDeck Bladder Systems require adequate aisle space to allow the Bladder to unfurl properly.
